

## Buy The Dip: Wal-Mart Stores (WMT)

In late August, we wrote [that Wal-Mart shares were a bargain](#) and today's overreaction to management's guidance presents an even better buying opportunity.

### WMT Price Already Implied Significant Profit Decline

At yesterday's closing price of \$67/share, WMT had a price to economic book value ([PEBV](#)) ratio of 0.7. This ratio implies that the market expects Wal-Mart's profits to permanently decline by 30%. Despite these low expectations, when management announced today that they expect earnings to fall as much as 12% next year, much less than what was already baked into the stock price, WMT fell nearly 10%. Such a negative reaction highlights how short-term the market can be.

### Wal-Mart Still Has A Strong Business

Wal-Mart has a long history of navigating the ins and outs of the ever-changing retail industry. As we highlighted in our previous report, Wal-Mart has actually grown after-tax profits ([NOPAT](#)) by 9% compounded annually since 1998. While profit growth had been slowing as of late, the company still grew NOPAT by 3% compounded annually over the past five years.

Additionally, Wal-Mart has an impressive history of generating returns on the capital invested into its business, something many analysts must be forgetting in light of today's announcements. Wal-Mart has generated a return on invested capital ([ROIC](#)) of 12% or higher in every year since 1999.

Lastly, over the past five years alone, Wal-Mart has generated over \$56 billion in [free cash flow](#). With today's announcements, Wal-Mart is going to be putting its capital to use and create a stronger company.

### Management's Announcement Positions Wal-Mart For Future Profit Growth

While the headlines will trumpet that Wal-Mart's earnings will decline year-over-year, the underlying decisions being made are aimed at positioning Wal-Mart to not only lead, but also win the retail battle. Far too often, people overlook the competitive advantages that Wal-Mart can extract from its store footprint and distribution systems. Today's announcements look to strengthen these advantages in two ways:

1. **Expanded In-Store Pickup:** In-store pickup leverages Wal-Mart's large store base to create shipping cost advantages. Additionally, Wal-Mart is expanding its grocery pickup services which creates benefits including time savings, easier errand planning, and fresher perishables as items are brought to the consumer upon arrival at the store. Ultimately in-store pickup allows Wal-Mart to be more efficient, lower shipping costs, and lower prices.
2. **Investments In Online Business:** There is no doubt that online retail is becoming more important in today's world. We think it naïve to overlook the fact that Wal-Mart already has a formidable online offering and further investment is a positive for shareholders. Wal-Mart's ability to connect the online and in-store shopping experience is a unique advantage that will position Wal-Mart ahead of it's competition.

### New Share Buyback Plus Dividend Yields Equal 8%

In addition to the downward guidance, Wal-Mart announced a new \$20 billion share repurchase program. This authorization is expected to be used over two years. The repurchase of \$10 billion a year would represent 5% of the current market cap and when combined with Wal-Mart's 3% dividend yield equals an impressive yield of 8%. 8% is a rather nice margin of safety to protect investors while Wal-Mart reinvests in its core business operations.

### Shares Present Excellent Buying Opportunity

At its low today, WMT had lost nearly \$21 billion in market cap. This rapid price depreciation provides long-term investors with a great opportunity. Wal-Mart itself has said they expect profit growth to return in fiscal 2019 and we too believe that, long-term, Wal-Mart will return to profit growth. In fact, if Wal-Mart can [grow profits by just 2% compounded annually over the next decade](#), the stock is worth \$108/share today – an 80% upside.

## ***New Constructs® – Profile***

---

### ***How New Constructs Creates Value for Clients***

We find it. You benefit. Cutting-edge technology enables us to scale our [forensics accounting expertise](#) across 3000+ stocks. We shine a light in the dark corners of SEC filings so our clients can make safer, more informed decisions.

Our [stock rating methodology](#) instantly informs you of the quality of the business and the fairness of the stock's valuation. We do the diligence on earnings quality and valuation so you don't have to.

In-depth risk/reward analysis underpins our ratings. Our rating methodology grades every stock, ETF, and mutual fund according to what we believe are the 5 most important criteria for assessing the quality of an equity. Each grade reflects the balance of potential risk and reward of buying that equity. Our analysis results in the 5 ratings described below. Very Attractive and Attractive correspond to a "Buy" rating, Very Dangerous and Dangerous correspond to a "Sell" rating, while Neutral corresponds to a "Hold" rating.

QUESTION: Why shouldn't fund research be as good as stock research? Why should fund investors rely on backward-looking price trends?

ANSWER: They should not.

Don't judge a fund by its cover. Take a look inside at its holdings and understand the quality of earnings and valuation of the stocks it holds. We enable you to choose the best fund based on its stock-picking merits so you do not have to rely solely on backward-looking technical metrics.

The drivers of our [forward-looking fund ratings](#) are Portfolio Management (i.e. the aggregated ratings of its holdings) and Total Annual Costs. The Total Annual Costs Rating ([details here](#)) captures the all-in cost of being in a fund over a 3-year holding period, the average period for all fund investors.

### ***Our Philosophy About Research***

Accounting data is not designed for equity investors, but for debt investors. [Accounting data must be translated into economic earnings](#) to understand the profitability and valuation relevant to equity investors. Respected investors (e.g. Adam Smith, Warren Buffett and Ben Graham) have repeatedly emphasized that accounting results should not be used to value stocks. [Economic earnings](#) are what matter because they are:

1. Based on the complete set of financial information available.
2. Standard for all companies.
3. A more accurate representation of the true underlying cash flows of the business.

### ***Additional Information***

Incorporated in July 2002, [New Constructs](#) is an independent publisher of investment research that provides clients with consulting and research services. We specialize in quality-of-earnings, forensic accounting and discounted cash flow valuation analyses for all U.S. public companies. We translate accounting data from 10Ks into economic financial statements, i.e. [NOPAT](#), [Invested Capital](#), and [WACC](#), to create [economic earnings models](#), which are necessary to understand the true profitability and valuation of companies. Visit the [Free Archive](#) to download samples of our research. New Constructs is a [BBB accredited](#) business and a member of the [Investorside Research Association](#).

## **DISCLOSURES**

---

New Constructs®, LLC (together with any subsidiaries and/or affiliates, “New Constructs”) is an independent organization with no management ties to the companies it covers. None of the members of New Constructs’ management team or the management team of any New Constructs’ affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs’ Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first 15 days after New Constructs issues a report on that security.

New Constructs is affiliated with Novo Capital Management, LLC, the general partner of a hedge fund.
