

ETF & Mutual Fund Rankings: Health Care Sector

The Health Care sector ranks eighth out of the ten sectors as detailed in our [3Q17 Sector Ratings for ETFs and Mutual Funds](#) report. [Last quarter](#), the Health Care sector ranked sixth. It gets our Dangerous rating, which is based on an aggregation of ratings of 22 ETFs and 86 mutual funds in the Health Care sector as of July 12, 2017. See a recap of our [2Q17 Sector Ratings here](#).

Figures 1 and 2 show the five best and worst rated ETFs and mutual funds in the sector. Not all Health Care sector ETFs and mutual funds are created the same. The number of holdings varies widely (from 23 to 363). This variation creates drastically different investment implications and, therefore, ratings.

Investors seeking exposure to the Health Care sector should buy one of the Attractive-or-better rated ETFs or mutual funds from Figures 1 and 2.

Our [Robo-Analyst technology](#) empowers our unique [ETF and mutual fund rating methodology](#), which leverages our rigorous analysis of each fund's holdings. We think advisors and investors focused on prudent investment decisions should include analysis of fund holdings in their research process for ETFs and mutual funds.

The Danger Within

Buying a fund without analyzing its holdings is like buying a stock without analyzing its business and finances. Put another way, research on fund holdings is necessary due diligence because a fund's performance is only as good as its holdings' performance. Don't just take our word for it, [see what Barron's says](#) on this matter.

PERFORMANCE OF HOLDINGS = PERFORMANCE OF FUND

Analyzing each holding within funds is no small task. Our [Robo-Analyst technology](#) enables us to perform this diligence with scale and provide the [research needed](#) to fulfill the fiduciary duty of care. More of the biggest names in the financial industry (see [At BlackRock, Machines Are Rising Over Managers to Pick Stocks](#)) are now embracing technology to leverage machines in the investment research process. Technology may be the only solution to the dual mandate for research: cut costs and fulfill the fiduciary duty of care. Investors, clients, advisors and analysts deserve the latest in technology to get the diligence required to make prudent investment decisions.
