

How to Find the Best Sector Mutual Funds

With an ever-growing list of similar-sounding mutual funds to choose from, finding the best is an increasingly difficult task. How can investors change the game to shift the odds in their favor?

Learn more about the best fundamental research

Don't Trust Mutual Fund Labels

There are at least 182 different Real Estate mutual funds and at least 623 mutual funds across eleven sectors. Do investors need 56+ choices on average per sector? How different can the mutual funds be?

Those 182 Real Estate mutual funds are very different from each other. With anywhere from 25 to 171 holdings, many of these Real Estate mutual funds have drastically different portfolios with differing risk profiles and performance outlooks.

The same is true for the mutual funds in any other sector, as each offers a very different mix of good and bad stocks. Telecom Services ranks first for stock selection. Real Estate ranks last. Details [here](#).

Avoiding Analysis Paralysis

We think the large number of sector mutual funds hurts investors more than it helps. Deep analysis on a mutual fund-by-mutual fund basis is simply not a realistic option so investors are exposed to insufficient analysis, missing profitable opportunities, or both. Analyzing mutual funds, done with the proper diligence¹, is far more difficult than analyzing stocks because it means analyzing all the stocks within each mutual fund. As stated above, that can be as many as 171 stocks, and sometimes even more, for one mutual fund.

Anyone focused on [fulfilling the fiduciary duty of care](#) recognizes that analyzing the holdings² of a mutual fund is critical to finding the best mutual fund. More [reliable](#) & [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research and analysis of fund holdings and provides investors with a [new source of alpha](#). Figure 1 shows our top rated mutual fund for each sector.

Figure 1: The Best Mutual Fund in Each Sector

Ticker	Name	Sector	Assets (\$mm)
FSCHX	Fidelity Select Portfolios: Chemicals	Basic Materials	\$852
VCDAX	Vanguard Consumer Discretionary Index Fund	Consumer Cyclical	\$8,247
FIJCX	Fidelity Select Portfolios: Consumer Staples Fund	Consumer Non-cyclical	\$1,521
FIQRX	Fidelity Investment Trust: Global Commodity Stock Fund	Energy	\$782
FSPCX	Fidelity Select Portfolios: Insurance	Financials	\$223
SWHFX	Schwab Health Care Fund	Healthcare	\$932
VINAX	Vanguard Industrials Index Fund	Industrials	\$5,626
BREUX	Baron Real Estate Fund	Real Estate	\$2,039
FDCPX	Fidelity Select Portfolios: Tech Hardware	Technology	\$1,056
VTCAx	Vanguard Communication Services Index Fund	Telecom Services	\$4,309
VUIAX	Vanguard Utilities Index Fund	Utilities	\$7,278

* Best mutual funds exclude funds with TNAs less than \$100 million for inadequate liquidity

¹ Three independent studies from respected institutions prove the superiority of our data, models, and ratings. Learn more [here](#).

² Harvard Business School features the powerful impact of our research automation technology in the case [New Constructs: Disrupting Fundamental Analysis with Robo-Analysts](#).

Amongst the mutual funds in Figure 1, Fidelity Select Portfolios: Insurance (FSPCX) ranks first overall, Fidelity Select Portfolios: Tech Hardware (FDCPX) ranks second, and Schwab Health Care Fund (SWHFX) ranks third. Baron Real Estate Fund (BREUX) ranks last.

How to Avoid “The Danger Within”

Why do you need to know the holdings of mutual funds before you buy?

You need to be sure you do not buy a fund that might blow up. Buying a fund without analyzing its holdings is like buying a stock without analyzing its business and finances. No matter how cheap, if it holds bad stocks, the mutual fund's performance will be bad. Don't just take my word for it, see [what Barron's says](#) on this matter.

PERFORMANCE OF FUNDS HOLDINGS = PERFORMANCE OF FUND

Analyzing each holding within funds is no small task. Our [Robo-Analyst technology](#) enables us to perform this diligence with scale and provide the [research needed](#) to fulfill the fiduciary duty of care. More of the biggest names in the financial industry (see [At BlackRock, Machines Are Rising Over Managers to Pick Stocks](#)) are now embracing technology to leverage machines in the investment research process. Technology may be the only solution to the dual mandate for research: cut costs and fulfill the fiduciary duty of care. Investors, clients, advisors and analysts deserve the latest in technology to get the diligence required to make prudent investment decisions.

If Only Investors Could Find Funds Rated by Their Holdings

Our [mutual fund ratings](#) leverage our [stock coverage](#). We rate mutual funds based on the aggregated ratings of the stocks each mutual fund holds.

Fidelity Select Portfolios: Insurance (FSPCX) is not only the top-rated Technology mutual fund but is also the overall number one-ranked sector mutual fund out of the 623 sector mutual funds that we cover.

The worst mutual fund in Figure 1 is Baron Real Estate Fund (BREUX), which gets an Unattractive rating. One would think mutual fund providers could do better for this sector.

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global’s (SPGI) Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
