

Featured Stock in January's Dividend Growth Model Portfolio

Nine stocks were added to our [Dividend Growth Stocks Model Portfolio](#) this month, which was made available to members on January 27, 2022.

Recap From December's Picks

Overall, 26 out of the 30 Dividend Growth Stocks outperformed the S&P 500 from December 29, 2021 through January 25, 2022. On a price return and total return basis, our Dividend Growth Stocks Model Portfolio (-2.1%) outperformed the S&P 500 (-9.0%) by 6.9%. The best performing stock was up 20%.

[Buy the Dividend Growth Stocks Model Portfolio](#)

The methodology for this model portfolio mimics an All Cap Blend style with a focus on dividend growth. Selected stocks earn an [Attractive or Very Attractive rating](#), generate positive free cash flow (FCF) and [economic earnings](#), offer a current dividend yield >1%, and have a 5+ year track record of consecutive dividend growth. This model portfolio is designed for investors who are more focused on long-term capital appreciation than current income, but still appreciate the power of dividends, especially growing dividends.

More [reliable](#) and [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research and provides investors with a [new source of alpha](#). Our proprietary [Robo-Analyst technology](#)¹ scales our forensic accounting expertise ([featured in Barron's](#))² to produce an unrivaled database of fundamental data.

Featured Stock From January: Target Corporation (TGT: \$218/share)

Target Corporation (TGT) is the featured stock from January's Dividend Growth Stocks Model Portfolio. We made Target a [Long Idea](#) in [June 2019](#). Since then, the stock is up 155% while the S&P 500 is up 94%. Even after its large outperformance, the stock still offers attractive risk/reward. See our most recent report on Target [here](#).

Target has grown revenue by 3% compounded annually and net operating profit after-tax (NOPAT) by 6% compounded annually over the past decade. The firm's NOPAT margin improved from 5% in fiscal 2011 (FYE is 1/30) to 7% over the trailing-twelve-month (TTM) period, while the firm's invested capital turns improved from 2 to 3 over the same time. Rising NOPAT margin and invested capital turns drive return on invested capital (ROIC) from 9% in fiscal 2011 to 19% TTM.

² See how our models and financial ratios are superior to Bloomberg and Capital IQ's (SPGI) analytics in the [detailed appendix of this paper](#).

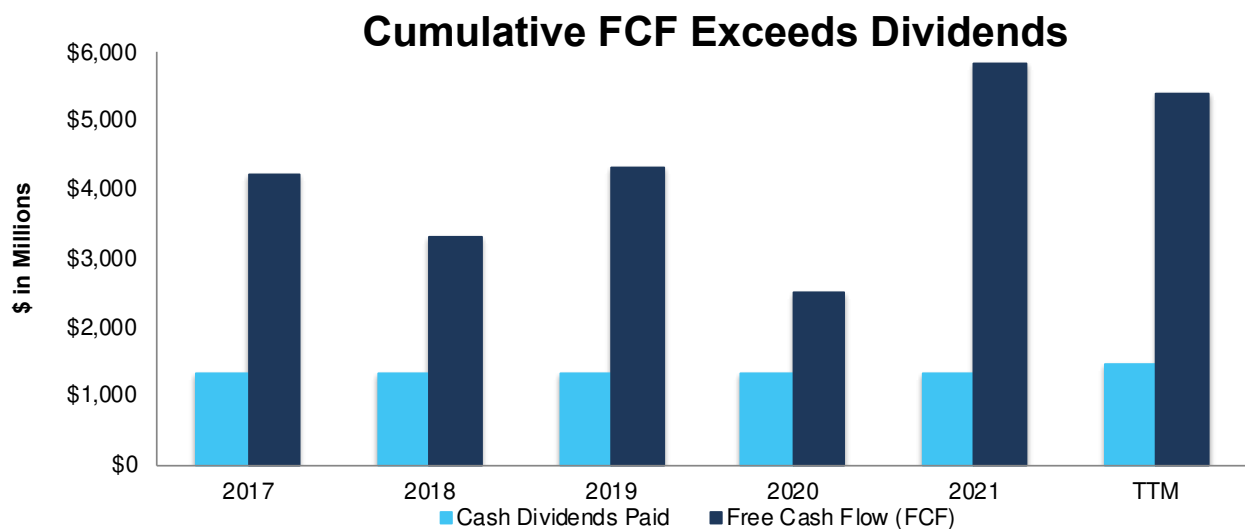

Target’s strong omnichannel operation benefited from accelerated ecommerce growth and the exit of weaker retailers during the COVID-19 pandemic. Going forward, Target is well positioned to grow revenue and profits from current levels. For reference, Target’s consensus revenue CAGR for fiscal 2022 – 2024 is 6.5%.

FCF Exceeds Dividends by Wide Margin

Target has increased its dividend for [50 consecutive years](#). The firm increased its regular dividend from \$2.36/share in fiscal 2017 to \$2.70/share in fiscal 2021, or 3% compounded annually. The current quarterly dividend, when annualized, equals \$3.60/share and provides a 1.7% dividend yield.

More importantly, Target’s strong free cash flow (FCF) exceeds the firm’s growing dividend payments. Target’s cumulative \$20.2 billion (19% of current market cap) in FCF is 3x the \$6.7 billion in dividends paid out from fiscal 2017 – 2021, per Figure 2. Over the TTM, Target generated \$5.4 billion in FCF and paid \$1.5 billion in dividends. Figure 2 also shows that Target’s FCF significantly exceeded its dividend payments in each of the past five years.

Figure 2: Free Cash Flow vs. Regular Dividend Payments

Sources: New Constructs, LLC and company filings

Companies with FCF well above dividend payments provide higher quality dividend growth opportunities because we know the firm generates the cash to support a higher dividend. On the other hand, the dividend of a company where FCF falls short of the dividend payment over time cannot be trusted to grow or even maintain its dividend because of inadequate free cash flow.

Target Has Upside Potential

At its current price of \$218/share, TGT has a price-to-economic book value (PEBV) ratio of 0.7. This ratio means the market expects Target’s NOPAT to permanently decline by 30%. This expectation seems overly pessimistic for a firm that has grown NOPAT by 6% compounded annually over the past two decades.

Even if Target’s NOPAT margins fall to 6% (vs. 7% TTM) and the firm grows NOPAT by just 3% compounded annually for the next decade, the stock is worth \$310/share today – a 42% upside. [See the math behind the reverse DCF scenario.](#)

Should the firm grow NOPAT more in line with historical growth rates, the stock has even more upside. Add in Target’s 1.7% dividend yield and history of dividend growth, and it’s clear why this stock is in January’s Dividend Growth Stocks Model Portfolio.

Critical Details Found in Financial Filings by Our [Robo-Analyst Technology](#)

Below are specifics on the adjustments we make based on Robo-Analyst findings in Target’s 10-Qs and 10-K:

Income Statement: we made \$1.4 billion in adjustments with a net effect of removing \$897 million in [non-operating expenses](#) (1% of revenue). See all adjustments made to Target’s income statement [here](#).

Balance Sheet: we made \$12.6 billion of adjustments to calculate invested capital with a net increase of \$1.9 billion. The most notable adjustment was \$4.1 billion (13% of reported net assets) in [asset write-downs](#). See all adjustments to Target's balance sheet [here](#).

Valuation: we made \$19.9 billion in adjustments with a net effect of decreasing shareholder value by \$18.7 billion. Other than [total debt](#), the most notable adjustment to shareholder value was \$1.2 billion in [net deferred tax liabilities](#). This adjustment represents 1% of Target's market value. See all adjustments to Target's valuation [here](#).

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” can overcome these flaws and provides [materially superior](#) fundamental data.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms’ data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global’s (SPGI) Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
