More [reliable](#) & [proprietary](#) fundamental data, proven in [The Journal of Financial Economics](#), drives our research and provides investors with a [new source of alpha](#). Our proprietary [Robo-Analyst technology](#)¹ scales our forensic accounting expertise ([featured in Barron's](#)) across thousands of stocks² to produce an unrivaled database of fundamental data.

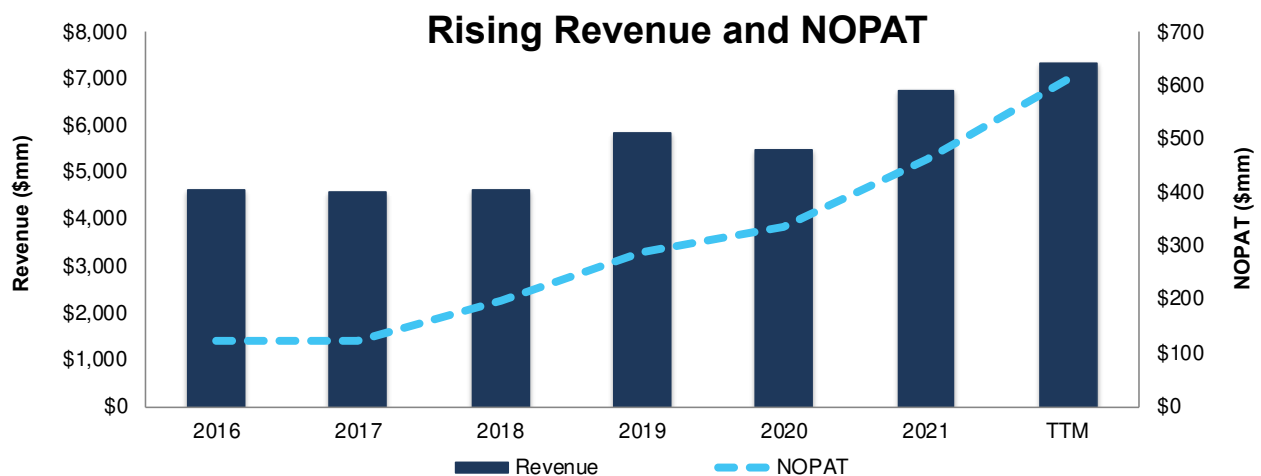

This Model Portfolio only includes stocks that earn an [Attractive or Very Attractive](#) rating and align executive compensation with improving ROIC. We think this combination provides a uniquely well-screened list of long ideas because return on invested capital ([ROIC](#)) is the [primary driver of shareholder value creation](#).

New Stock Feature for March: Commercial Metals Company (CMC: \$41/share)

Commercial Metals Company (CMC) is the featured stock in March's Exec Comp Aligned with ROIC Model Portfolio.

Commercial Metals Company has grown revenue and net operating profit after tax ([NOPAT](#)) by 8% and 31% compounded annually, respectively, over the past five years, per Figure 1. The company's NOPAT margin rose from 3% in fiscal 2016 (FYE is 8/31) to 8% over the trailing twelve months (TTM), while [invested capital turns](#) improved from 1.5 to 1.8 over the same time. Rising NOPAT margins and invested capital turns drove the company's ROIC from 4% in fiscal 2016 to 15% TTM.

Executive Compensation Properly Aligns Executive Incentives

Commercial Metals Company’s executive compensation plan aligns executives’ interests with shareholders’ interests by tying its annual cash bonus to the achievement of a target ROIC. Furthermore, 75% of executives’ performance share units (PSUs) are tied to the achievement of a positive three-year ROIC.

Commercial Metals Company’s inclusion of ROIC as a performance goal has helped create shareholder value through rising ROIC and [economic earnings](#). Commercial Metals Company’s ROIC improved from 4% in fiscal 2016 to 15% TTM, and the company’s economic earnings grew from -\$45 million to \$376 million over the same period.

Figure 2: Commercial Metals Company’s ROIC: Fiscal 2016 – TTM

Sources: New Constructs, LLC and company filings

Commercial Metals Company Is Undervalued

At its current price of \$41/share, CMC has a price-to-economic book value ([PEBV](#)) ratio of 0.6. This ratio means the market expects Commercial Metals Company’s NOPAT to permanently decline by 40%. This expectation seems overly pessimistic for a company that has grown NOPAT by 5% compounded annually over the past two decades.

If Commercial Metals Company’s NOPAT margin falls to 7% (equal to fiscal 2021 vs. 8% TTM) and the company’s NOPAT grows by just 3% compounded annually over the next 10 years, the stock is worth \$59/share today – a 44% upside. [See the math behind this reverse DCF scenario](#). Should the company’s NOPAT grow more in line with historical growth rates, the stock has even more upside.

Critical Details Found in Financial Filings by Our [Robo-Analyst Technology](#)

Below are specifics on the adjustments we make based on Robo-Analyst findings in Commercial Metals Company’s 10-Q’s and 10-K:

Income Statement: we made \$111 million in adjustments, with a net effect of removing \$50 million in [non-operating expenses](#) (1% of revenue). Clients can see all adjustments made to Commercial Metals Company’s income statement on the GAAP Reconciliation tab on the Ratings page on our website.

Balance Sheet: we made \$1.3 billion in adjustments to calculate invested capital with a net increase of \$264 million. One of the largest adjustments was \$540 million (15% of reported net assets) in [asset write-downs](#). Clients can see all adjustments made to Commercial Metals Company’s balance sheet on the GAAP Reconciliation tab on the Ratings page on our website.

Valuation: we made \$1.4 billion in adjustments with a net effect of decreasing shareholder value by \$1.2 billion. Apart from [total debt](#), the most notable adjustment to shareholder value was \$85 million in [deferred tax liabilities](#). This adjustment represents 2% of Commercial Metals Company’s market cap. Clients can see all adjustments to Commercial Metals Company’s valuation on the GAAP Reconciliation tab on the Ratings page on our website.

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms’ data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by S&P Global’s (*SPGI*) *Adjustments* individually.” – pp. 14, 1st para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5th para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3rd para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).
