

## Position Close Update: Equitable Holdings Inc. (EQH)

**Equitable Holdings Inc. (EQH) – Closing Long Position – up 37% vs. S&P up 51%**

We made Equitable Holdings (EQH: \$29/share) a Long Idea on [May 9, 2018](#), prior to its IPO. EQH earned a Neutral [rating](#) at the time of our report. We believed the market was ignoring the business’ understated GAAP earnings and improving profitability.

This report leverages our cutting-edge [Robo-Analyst technology](#) to deliver [proven-superior](#)<sup>1</sup> fundamental research and support more cost-effective fulfillment of the [fiduciary duty of care](#).

[Learn more about the best fundamental research](#)

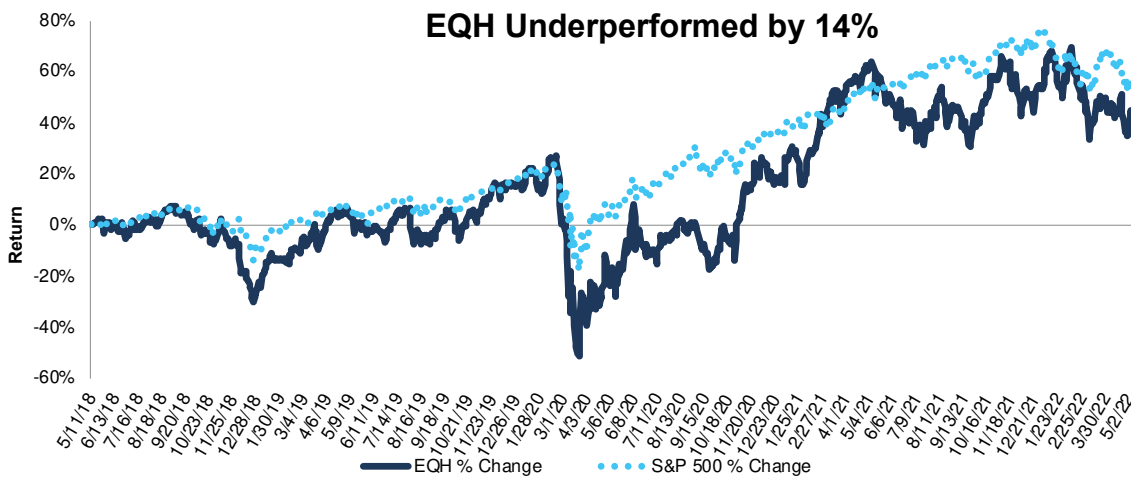

During the nearly four-year holding period, EQH underperformed by 14% as a long position, rising 37% while the S&P 500 gained 51%.

In our original report, we demonstrated that if EQH were valued at the same level as its peers, it would be worth \$29/share – equal to today’s price.

Though the stock has risen since its IPO, the company’s fundamentals have headed the other direction. Equitable Holdings’ [Core Earnings](#) have fallen from \$1.3 billion in 2017 to -\$586 million over the trailing twelve months (TTM) and have been negative in each of the past three years. The company’s return on invested capital ([ROIC](#)) has fallen from 6.9% in 2017 to -0.5% over the TTM. Equitable Holdings’ [economic book value](#), or no growth value, has fallen from \$25/share to -\$15/share over the same time.

Given the rise in the stock’s valuation, and the weakening of the company’s fundamentals, this stock no longer presents favorable risk/reward. We’re closing this long position.

<sup>1</sup> Our research utilizes our [Core Earnings](#), a more reliable measure of profits, as proven in [Core Earnings: New Data & Evidence](#), written by professors at Harvard Business School (HBS) & MIT Sloan and published in [The Journal of Financial Economics](#).

## **It's Official: We Offer the Best Fundamental Data in the World**

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our “novel database” enables investors to overcome these flaws and apply [reliable](#) fundamental data in their research.
3. Our proprietary measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

### **Best Fundamental Data in the World**

Forthcoming in [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global’s (SPGI) Adjustments* individually.” – pp. 14, 1<sup>st</sup> para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2<sup>nd</sup> para.

### **Superior Models**

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [ as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5<sup>th</sup> para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2<sup>nd</sup> para.

### **Superior Stock Ratings**

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Indiana’s Kelley School of Business. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3<sup>rd</sup> para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3<sup>rd</sup> para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

## ***DISCLOSURES***

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers.
