Featured Stock in June's Safest Dividend Yields Model Portfolio

Six new stocks make our Safest Dividend Yields Model Portfolio this month, which was made available to members on June 23, 2022.

Recap from May's Picks

On a price return basis, our Safest Dividend Yields Model Portfolio (-6.6%) underperformed the S&P 500 (-3.7%) by 2.9% from May 19, 2022 through June 21, 2022. On a total return basis, the Model Portfolio (-5.9%) underperformed the S&P 500 (-3.3%) by 2.6% over the same time. The best performing large cap stock was up 7% and the best performing small cap stock was up 4%. Overall, eight out of the 20 Safest Dividend Yield stocks outperformed their respective benchmarks (S&P 500 and Russell 2000) from May 19, 2022 through June 21, 2022.

Buy the Safest Dividend Yields Model Portfolio

This report leverages our cutting-edge Robo-Analyst technology to deliver proven-superior[1] fundamental research and support more cost-effective fulfillment of the fiduciary duty of care.

This Model Portfolio only includes stocks that earn an Attractive or Very Attractive rating, have positive free cash flow and economic earnings, and offer a dividend yield greater than 3%. Companies with strong free cash flow provide higher quality and safer dividend yields because we know they have the cash to support the dividend. We think this portfolio provides a uniquely well-screened group of stocks that can help clients outperform.

Featured Stock for June: United Parcel Service, Inc. (UPS: $180/share)

United Parcel Service, Inc. (UPS) is the featured stock in June's Safest Dividend Yields Model Portfolio.

United Parcel Service has grown revenue by 6% compounded annually and net operating profit after-tax (NOPAT) by 9% compounded annually since 2011. United Parcel Service's NOPAT margin rose from 8% in 2011 to 11% over the trailing twelve months (TTM), while invested capital turns improved from 1.6 to 1.9 over the same time. Rising NOPAT margins and invested capital turns drive the company's return on invested capital (ROIC) from 13% in 2011 to 20% TTM.

Figure 1: UPS' Revenue and NOPAT Since 2011

[1] Our research utilizes our Core Earnings, a more reliable measure of profits, as proven in Core Earnings: New Data & Evidence, written by professors at Harvard Business School (HBS) & MIT Sloan and published in The Journal of Financial Economics.

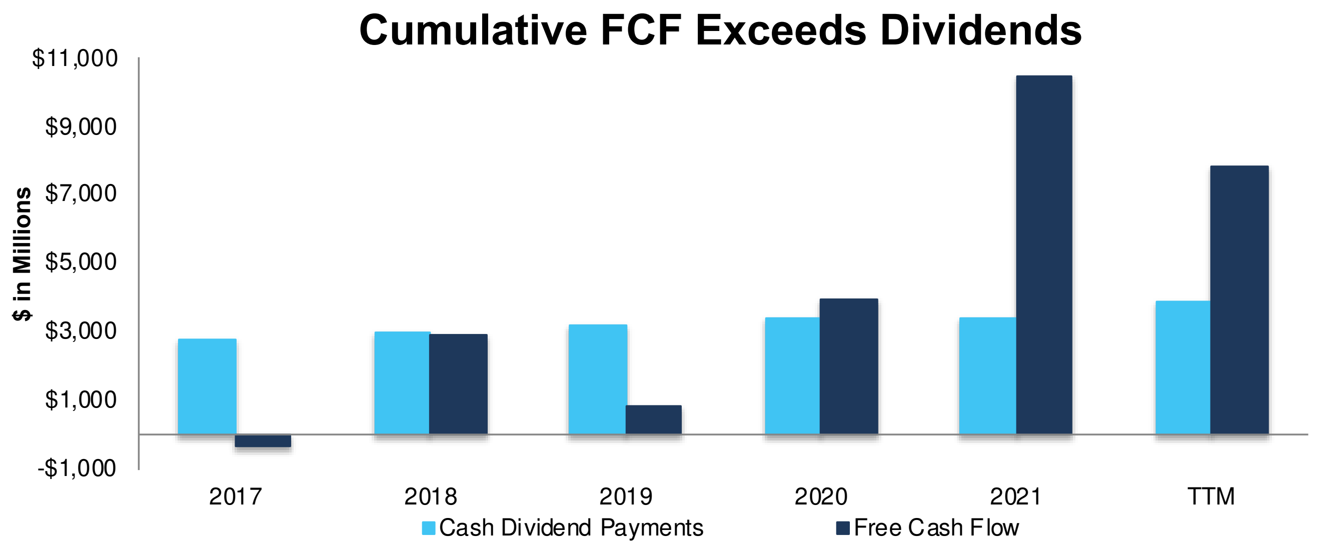
Free Cash Flow Supports Regular Dividend Payments

United Parcel Service has paid dividends in each year since 1999 and increased its regular dividend from $3.32/share in 2017 to $4.08/share in 2021. The current quarterly dividend, when annualized, provides a 3.4% dividend yield.

United Parcel Service's cumulative FCF exceeds its regular dividend payments. From 2017 to 2021, UPS generated $17.9 billion (11% of current market cap) in FCF while paying $15.8 billion in dividends, per Figure 2. Over the TTM, UPS has generated $7.9 billion in FCF and paid $3.9 billion in dividends.

Should the economic slowdown in 2022 worsen, and the company's FCF turn negative as it did in 2007 and 2017, the company's $12.5 billion of cash and cash equivalents provide an extra layer of protection for the dividend.

Figure 2: UPS' FCF vs. Regular Dividends Since 2017



Sources: New Constructs, LLC and company filings

Companies with strong FCF provide higher quality dividend yields because the firm has the cash to support its dividend. Dividends from companies with low or negative FCF cannot be trusted as much because the company may not be able to sustain paying dividends.

UPS Is Undervalued

At its current price of $180/share, UPS has a price-to-economic book value (PEBV) ratio of 0.8. This ratio means the market expects United Parcel Service's NOPAT to permanently decline by 20%. This expectation seems overly pessimistic given that United Parcel Service grew NOPAT by 9% compounded annually over the past decade and 15% compounded annually over the past five years.

Even if United Parcel Service's NOPAT margin falls to 9% (three-year average vs. 11% over the TTM) and the company's NOPAT grows just 2% compounded annually over the next decade, the stock is worth $225/share today – a 25% upside. See the math behind this reverse DCF scenario. Should the company grow NOPAT more in line with historical growth rates, the stock has even more upside.

Critical Details Found in Financial Filings by Our Robo-Analyst Technology

Below are specifics on the adjustments we make based on Robo-Analyst findings in United Parcel Service's 10-K and 10-Qs:

Income Statement: we made $6.5 billion in adjustments with a net effect of removing $2.9 million in non-operating income (3% of revenue). Clients can see all adjustments made to United Parcel Service's income statement on the GAAP Reconciliation tab on the Ratings page on our website.

Balance Sheet: we made $13.6 billion in adjustments to calculate invested capital with a net increase of $1.2 billion. The most notable adjustment was $3.3 billion (6% of reported net assets) in other comprehensive income.

See all adjustments made to United Parcel Service's balance sheet on the GAAP Reconciliation tab on the Ratings page on our website.

Valuation: we made $45.7 billion in adjustments with a net effect of decreasing shareholder value by $30.5 billion. Apart from total debt, one of the most notable adjustments to shareholder value was $7.9 billion in underfunded pensions. This adjustment represents 5% of United Parcel Service's market value. See all adjustments to United Parcel Service's valuation on the GAAP Reconciliation tab on the Ratings page on our website.

It's Official: We Offer the Best Fundamental Data in the World

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. Legacy fundamental datasets suffer from significant inaccuracies, omissions and biases.
2. Only our "novel database" enables investors to overcome these flaws and apply reliable fundamental data in their research.
3. Our proprietary measures of Core Earnings and Earnings Distortion materially improve stock picking and forecasting of profits.

Best Fundamental Data in the World

Forthcoming in The Journal of Financial Economics, a top peer-reviewed journal, Core Earnings: New Data & Evidence proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior fundamental data, earnings models, and research. More details.

Key quotes from the paper:

- "[New Constructs'] *Total Adjustments* differs significantly from the items identified and excluded from Compustat's adjusted earnings measures. For example… 50% to 70% of the variation in *Total Adjustments* is not explained by *S&P Global's (SPGI) Adjustments* individually." – pp. 14, 1st para.
- "A final source of differences [between New Constructs' and S&P Global's data] is due to data collection oversights…we identified cases where Compustat did not collect information relating to firms' income that is useful in assessing core earnings." – pp. 16, 2nd para.

Superior Models

A top accounting firm features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg's in Getting ROIC Right. See the Appendix for direct comparison details.

Key quotes from the paper:

- "…an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC." – pp. 8, 5th para.
- "The majority of the difference…comes from New Constructs' machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies." – pp. 4, 2nd para.

Superior Stock Ratings

Robo-Analysts' stock ratings outperform those from human analysts as shown in this paper from Indiana's Kelley School of Business. Bloomberg features the paper here.

Key quotes from the paper:

- "the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant." – pp. 6, 3rd para.
- "Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts." – pp. 20, 3rd para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are here.

DISCLOSURES

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.
New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
