

## Free Stock Pick from our Most Attractive Stocks Model Portfolio for January 2025

Here's another free stock pick to start the new year. We think now is an especially important time for trust-worthy research, as detailed in our latest training: [Unveiling a Trust-Based Rating System for Smarter Investing](#). We put our money where our mouth is by providing free research and training.

Most investors might wonder how fundamental research from one firm could be more trust-worthy than another, and they would be right to question such a claim. Fortunately, you do not have to take my word for it because Ernst & Young, Harvard Business School, MIT Sloan and The Journal of Financial Economics have vetted our research and [published papers proving its superiority](#).

Which leads us to our free stock pick this week from our Most Attractive Stocks Model Portfolio. This Model Portfolio scans the entire market to find the best stocks. Only the best.

We leverage our proven superior data to ensure we truly know the earnings of every stock we cover. Our proprietary reverse Discounted Cash Flow models give us unrivaled insight into the valuation of stocks. Combining superior earnings and valuation research produces stock ratings that are proven to outperform.

So, when we share this free pick, you are getting the product of lots of hard work by many experts using cutting-edge Robo-Analyst technology developed over 20+ years. In other words, this freebie is valuable.

Keep an eye out for the [free pick](#) from our Most Dangerous Stocks Model Portfolio, which will be published this week as well! The work that goes into that report is just as valuable.

Without further ado, you can find the free pick below along with a concise summary of why we like the stock. It is not a full Long Idea report, but it gives you insight into the rigor of our research and approach to picking stocks. Whether you're a subscriber or not, we think it is important that you're able to see our research on stocks on a regular basis. We're proud to share our work.

We hope you enjoy this research. Feel free to share with friends and colleagues!

We update this Model Portfolio monthly. The latest [Most Attractive](#) and [Most Dangerous](#) stocks Model Portfolios were updated and published for clients on January 8, 2024.

### Free Most Attractive Stocks Pick: Tenet Healthcare Corp (THC)

Tenet Healthcare (THC: \$130/share) is the featured stock from January's Most Attractive Stocks Model Portfolio.

Tenet Healthcare has grown revenue and net operating profit after tax ([NOPAT](#)) by 6% and 16% compounded annually since 2013, respectively. Tenet Healthcare's NOPAT margin increased from 5% in 2013 to 12% in the TTM while [invested capital turns](#) fell from 0.9 to 0.7 over the same time. Rising NOPAT margins are enough to offset falling invested capital turns and drive Tenet Healthcare's return on invested capital ([ROIC](#)) from 4% in 2013 to 9% in the TTM.

**Figure 1: Tenet Healthcare's Revenue and NOPAT Since 2013**

Sources: New Constructs, LLC and company filings

### Tenet Healthcare Is Undervalued

At its current price of \$130/share, THC has a price-to-economic book value ([PEBV](#)) ratio of 0.7. This ratio means the market expects Tenet Healthcare's NOPAT to permanently decline by 30%. This expectation seems overly pessimistic for a company that has grown NOPAT by 10% compounded annually since 2018 and 16% compounded annually since 2013.

Even if Tenet Healthcare's NOPAT margin falls to 9% (below TTM NOPAT margin of 12% and five-year average margin of 10%) and the company's revenue grows just 2% (below ten-year compound annual growth rate of 6%) compounded annually through 2033, the stock would be worth [\\$160/share today](#) – a 23% upside. In this scenario, Tenet Healthcare's NOPAT would grow <1% compounded annually through 2033. Should Tenet Healthcare grow profits more in line with historical levels, the stock has even more upside.

### Critical Details Found in Financial Filings by Our [Robo-Analyst Technology](#)

Below are specifics on the adjustments we made based on Robo-Analyst findings in Tenet Healthcare's 10-Qs and 10-Ks:

**Income Statement:** we made over \$2.2 billion in adjustments, with a net effect of removing around \$1.5 billion in [non-operating expenses](#). Professional members can see all adjustments made to Tenet Healthcare's income statement on the GAAP Reconciliation tab on the Ratings page on our website.

**Balance Sheet:** we made over \$7.4 billion in adjustments to calculate invested capital with a net increase of over \$5.1 billion. One of the most notable adjustments was for [asset write downs](#). Professional members can see all adjustments made to Tenet Healthcare's balance sheet on the GAAP Reconciliation tab on the Ratings page on our website.

**Valuation:** we made over \$22.0 billion in adjustments to shareholder value, with a net decrease of around \$15.9 billion. The most notable adjustment was for [total debt](#). Professional members can see all adjustments to Tenet Healthcare's valuation on the GAAP Reconciliation tab on the Ratings page on our website.

## ***It's Official: We Deliver the Best Fundamental Data in the World***

---

Many firms claim their research is superior, but none of them can prove it with independent studies from highly-respected institutions as we can. Three different papers from both the public and private sectors show:

1. The stock market is missing footnotes – and only we have that critical data.
2. Legacy fundamental datasets suffer from significant inaccuracies, omissions, and biases.
3. Our proprietary drives novel alpha. Our measures of [Core Earnings](#) and [Earnings Distortion](#) materially improve stock picking and forecasting of profits.

### **Best Fundamental Data in the World**

In [The Journal of Financial Economics](#), a top peer-reviewed journal, [Core Earnings: New Data & Evidence](#) proves our Robo-Analyst technology overcomes material shortcomings in legacy firms' data collection processes to provide superior [fundamental data](#), [earnings](#) models, and [research](#). More [details](#).

Key quotes from the paper:

- “[New Constructs’] *Total Adjustments* differs significantly from the items identified and excluded from Compustat’s adjusted earnings measures. For example... 50% to 70% of the variation in *Total Adjustments* is not explained by S&P Global’s (SPGI) *Adjustments* individually.” – pp. 14, 1<sup>st</sup> para.
- “A final source of differences [between New Constructs’ and S&P Global’s data] is due to data collection oversights...we identified cases where Compustat did not collect information relating to firms’ income that is useful in assessing core earnings.” – pp. 16, 2<sup>nd</sup> para.

### **Superior Models**

Ernst & Young features the superiority of our ROIC, NOPAT and Invested Capital research to Capital IQ & Bloomberg’s in [Getting ROIC Right](#). See the [Appendix](#) for direct comparison details.

Key quotes from the paper:

- “...an accurate calculation of ROIC requires more diligence than often occurs in some of the common, off-the-shelf ROIC calculations. Only by scouring the footnotes and the MD&A [as New Constructs does] can investors get an accurate calculation of ROIC.” – pp. 8, 5<sup>th</sup> para.
- “The majority of the difference...comes from New Constructs’ machine learning approach, which leverages technology to calculate ROIC by applying accounting adjustments that may be buried deeply in the footnotes across thousands of companies.” – pp. 4, 2<sup>nd</sup> para.

### **Superior Stock Ratings**

Robo-Analysts’ stock ratings outperform those from human analysts as shown in this [paper](#) from Harvard Business School. Bloomberg features the paper [here](#).

Key quotes from the paper:

- “the portfolios formed following the buy recommendations of Robo-Analysts earn abnormal returns that are statistically and economically significant.” – pp. 6, 3<sup>rd</sup> para.
- “Our results ultimately suggest that Robo-Analysts are a valuable, alternative information intermediary to traditional sell-side analysts.” – pp. 20, 3<sup>rd</sup> para.

Our mission is to provide the best fundamental analysis of public and private businesses in the world and make it affordable for all investors, not just Wall Street insiders.

We believe every investor deserves to know the whole truth about the profitability and valuation of any company they consider for investment. More details on our cutting-edge technology and how we use it are [here](#).

## ***DISCLOSURES***

New Constructs®, LLC (together with any subsidiaries and/or affiliates, "New Constructs") is an independent organization with no management ties to the companies it covers. None of the members of New Constructs' management team or the management team of any New Constructs' affiliate holds a seat on the Board of Directors of any of the companies New Constructs covers. New Constructs does not perform any investment or merchant banking functions and does not operate a trading desk.

New Constructs' Stock Ownership Policy prevents any of its employees or managers from engaging in Insider Trading and restricts any trading whereby an employee may exploit inside information regarding our stock research. In addition, employees and managers of the company are bound by a code of ethics that restricts them from purchasing or selling a security that they know or should have known was under consideration for inclusion in a New Constructs report nor may they purchase or sell a security for the first two days after New Constructs issues a report on that security.
